DEPARTMENT OF GEOGRAPHY

REMEDIAL CLASS

SUBJECT: GEOGRAPHY SEM-III

Introduction: A remedial class for weaker students in graduation is conducted every year for one week. Remedial class is important educational process through which students can learn and acquire knowledge. It is also important for the students who are coming from various situation, condition and different background. Remedial class is helpful for the students who are coming from basically Rural Areas.

~~Remedial course provides better opportunity for rural area students. The students can improve their knowledge in the field of Geography. Students will able to conduct field survey effectively in practical geography.~~

Objective: The main objective of the remedial class is to the gap between Slow and fast learners to enhance the capacity of learning level of weaker students. University level subjects they would be studying in graduation, to give the Slow students the confidence, courage and seriousness, to develop the map reading skill in Geography.

Importance: A Remedial course has its importance in success of students in the field of geography. Practical knowledge, map reading skill, statistical analysis, field survey, land use survey are important for carrier opportunities in the geographers. We need practical exercise of geography and map reading skills. Student changes the personality as well as mental ability through the course. Student will get an opportunity of placement and make his career.

Selection procedure: The students who are admitted in second and third year of graduation belong to slow learner; backward classes are proposed students of the course.
