Certificate Course

“Maintenance and Repairing of Electrical and Electronics Equipment”

Certificate Course Outcome

This Certificate course is a platform for learning about troubleshooting electrical and electronic equipment of home appliances and laboratories. After clearing the basic concept of electronics and electrical circuits, most of the students purchase some tools, multimeters, and testers. They were bringing faulty electronics or electrical devices like chargers, LED bulbs, LED torches, LED tube light, electric press, heater, Audio amplifiers etc. from their home and tried to repair it during practical classes in the Electronics Laboratory.

After completion of the Certificate course, the following outcomes are identified.

Students are able to

1. Handle measuring instruments like multimeter, continuity tester, etc. properly.
2. Identify the component and check whether the electronics component is functioning or non-functioning.
3. Check the power cable connection with any electronics and electrical equipment.
4. Measuring ac and dc voltage across the components connected in the circuit.
5. Repair and make the domestic electrical wiring.
6. Troubleshoot the electronics circuit at the primary level.
7. Troubleshoot the DC power supply.
8. Acquiring knowledge about domestic electrical appliances, need for earthing, electric shocks etc.
