Summary

In this thesis we introduced the concept of pseudo-complementation on an Almost Lattice (AL) and gave certain examples of independency of the axioms in the definition of pseudo-complementation. Also, we proved that every pseudo-complemented lattice is a pseudo-complemented AL. Obtained several properties of pseudo-complemented ALs and also proved that pseudo-complementation on L is equationally definable. It is well known that, in the case of lattices, the pseudo-complementation, if exists, then it is unique but, in the case of ALs, we observed that there can be several pseudo-complementations. In fact, if there is a pseudo-complementation on an AL L , then we proved that each maximal element of L gives rise to a pseudo-complementation and that this correspondence between the set of all maximal elements in L and the set of all pseudo-complementations on L is one-to-one. Also, we proved that if $*$ is a pseudo-complementation on an AL L , then the set $L^* = \{a^* : a \in L\}$
