Best Practice No 2

Enhancing Campus Sustainability: QR Code Integration for Plant Census, Identification, Conservation, and Beautification

Title of the practice:

Enhancing Campus Sustainability: QR Code Integration for Plant Census, Identification, Conservation, and Beautification

Objectives of the Practice:

1. **To Implement QR Code Technology for Plant Identification:** Introduce and utilize QR codes to digitally catalog and identify plant species across the campus, enabling easy access to detailed information about each plant's characteristics and ecological significance.
2. **To Conduct a Comprehensive Plant Census on Campus:** Create an updated inventory of all plant species present on the campus, categorizing them based on their type, origin, and conservation status, to support effective monitoring and management.
3. **To Promote Plant Conservation Efforts:** Use the QR code system to raise awareness about endangered and native plants, encouraging conservation efforts and responsible campus landscaping that prioritizes ecological balance.
4. **To Enhance Campus Aesthetics and Biodiversity:** Contribute to the beautification of the campus by selecting diverse, visually appealing plants that enrich the campus environment while also maintaining ecological harmony.

5. **To Educate and Engage the Campus Community:** Foster a deeper understanding of campus biodiversity among students, staff, and visitors by providing accessible plant information via QR codes, encouraging greater engagement in sustainability initiatives.
6. **To Support Green Wealth Preservation and Sustainable Campus Practices:** Ensure long-term sustainability by promoting the conservation of plant species, maintaining green spaces, and supporting the health of the campus ecosystem, aligning with broader environmental and conservation goals.
7. **To Facilitate Data Collection and Analysis for Future Conservation Planning:** Use the collected data from QR codes and the plant census to guide future campus landscaping projects, ensuring that plant species selection and conservation strategies are based on accurate, real-time information.
8. **To Foster Collaboration with Local Environmental Organizations:** Create opportunities for partnerships with local environmental groups and institutions to further the campus's commitment to plant conservation and biodiversity preservation.

The Context of the Best Practice:

As part of efforts to enhance campus sustainability, integrating QR codes for plant-related activities offers an innovative and effective solution. By utilizing QR codes, campuses can conduct a digital plant census, provide plant identification, promote conservation efforts, and enhance campus beautification. This approach leverages technology to engage students, staff, and visitors, creating an interactive and educational environment while fostering environmental stewardship. Additionally, it aligns with sustainability goals by reducing paper usage and enabling real-time updates.

The brief Report of the Best Practice:

1. Introduction:

This annual report highlights the implementation and outcomes of the QR Code Integration initiative aimed at fostering sustainability on campus. This innovative practice merges technology and environmental stewardship, creating a dynamic platform for plant census, identification, conservation, and beautification.

2. Objectives

- Conduct a comprehensive digital plant census to catalog campus flora.
- Facilitate easy and interactive plant identification for students, staff, and visitors.
- Promote awareness and participation in plant conservation efforts.
- Enhance the aesthetic appeal of the campus while promoting biodiversity.

3. Implementation Strategy

- **Mapping and Cataloging:** A detailed mapping of all significant plants on campus was conducted, including species, location, and unique characteristics.
- **QR Code Deployment:** QR codes were generated for each plant or plant group, linking to a digital database with plant details.
- **User Engagement:** QR codes were placed on plaques near plants, allowing users to scan and access information instantly.
- **Maintenance:** Regular updates to the database were made to incorporate new plantings and monitor plant health.

4. Key Achievements

Plant Census Completion: Cataloged of many plant species on campus, creating a comprehensive digital repository. Clean and bioriched campus of the college consist of trees shrubs, herbs, palms along with some exotic flora. Few trees are naturally Grown whereas remaining tress are planted to make the campus ecofriendly. Entire campus surveyed to collect the tree data. More than 524 tree individuals with 32 genera belonging to 19 families were recorded excluding 300 newly planted small growing tress.

- **Increased Awareness:** To increased awareness among the students, staff and visitors messages has been circulated to scan the QR and see the details about specific plant.
- **Conservation Impact:** Initiated conservation drives focusing on rare and endangered species found on campus by taking plantation programmes every year.
- **Aesthetic Improvements:** Planted more than 500 new ornamental and native plants, enhancing campus beautification.

ORNAMENTAL GARDEN:

Ornamental Garden of the College is situated in the premises of main building. Well planed garden with some perennial plants like *Phoenix Palm*, *Areca Palm*, *Ficus benjamina*, *Rosa indica*, *Lantena camera*, *Musanda spp.*, *Calandra*. *Hamelia*, *Hibiscus rosa-sinensis*, *Ixora*, etc.; woody climbers like *Antigonon*, *Bougainville*, *Alamanda*, *Combratum*, etc.; flowering seasonal like *Chrysanthemum*, *Gaillardia*, *Cosmos*, etc

MEDICINAL PLANT GARDEN :

Medicinal Plant Garden of the college is developed in the 7000 sq.ft. area which is well protected.

Some of the medicinally important plants of the garden are *Plumbago zeylanica*, *Oroxylum indicum*, *Andrographis paniculata*, *Adothoda vasica*, *Semicarpus anacardium*, *Prosopis specigera*, *Terminalia chebula*, *Feronia elephantum*, *Carnarium strictum*, *Acacia concinna*, *Sapindus trifoliatus*, *Bixa arelenne*, *Gymnima sylvestris*, *Vitex negundo*, *Boerhaavia diffusa*, *Dalbergia sissoo*, *evolvulus alsinoides*, *Cassia fistula*, *Calatropis procera*, *Azadirachta indica*, *Asperagus racemosus*, *Terminalia belarica*, *Carissa carandns*, *Datura stromanium*, *Pongamia pinnata*, *Gardenia resinifera*, *Mimusops elengi*.

DEVELOPMENT OF FOREST AND ITS CONSERVATION:

College has developed about 2 hector of forest around the campus in three different patches. The age of forest is about 30 years. Different tree species of the forest are *Tectona grandis*, *Acacia nilotia*, *Azadiracta indica*, *Delonix regia*, *Pongamia pinnata*, *Dalbergia sissoo*, *Syzigium commune*, *Cassia fistula*, *lagerstroemia indica*, *Sapindus trifalius*, *Tecoma stans*, *Bombax ciba*, *Malingtonia*, *Semicarpus anacardium*, *Adinsonia digilata*, *Mimu spp*, *elengi*, *Gmelina arborea*, *Mangifera indica*, *Polyalthia longifolia*, *Tamarindus indica*, *Diospyros malanoxylon*, etc. There are about 200 trees growing well in the developed forest. These trees are the better sources of seeds and contribute for the development of "Seed Bank". We are developing new seedlings from the collected seeds in our nursery.

TREE PLANTATION PROGRAMME :

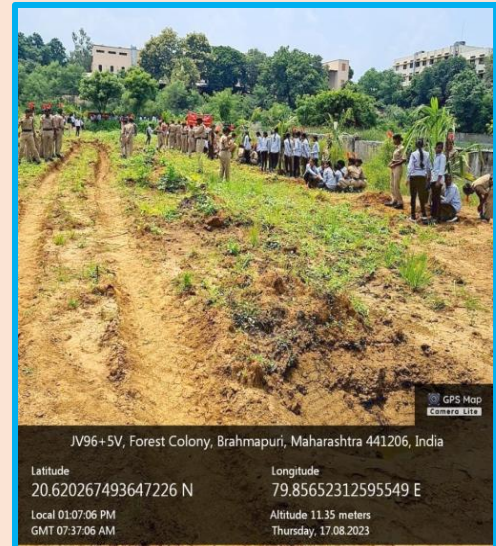

Tree plantation is a regular practice of the college. Last year plantation of near about 200 different plants is done and are well growing. Tree species planted are *Azadiracta indica*, *Anthocephalus cadamba*, *Pongamia pinnata*, etc. Considering the future need of natural shade, plantation is done in the cycle stand of students & periphery of the college ground.

BARREN LAND DEVELOPMENT:

About 2 hector land of the college is barran and rate of soil erosion is a very fast. To prevent soil erosion it is necessary to have a plation programme. Some species of xerophytic habit are selected for this, such as *Ficus bengaliensia*, *Ficus religiosa*, *Pongamia pinnata*, *Siamea spp.*, *Peltaphorum spp.*, *Cassia fistula*, *Delonix regia*, *Putrangiva*, etc.

EX-SITU CONSERVATION OF THREATENED PLANTS :

Under the Ex-situ conservation programme different threatened plants of medicinal value are conserved, department of Botany, under the Mentorship of Dr. A. J. Mungole has prepared a Major Research Project to be submitted to funding agency for their Ex-situ conservation.

SHADE-NET HOUSE :

Shade-Net House of the college is constructed in the 450 sq.ft., which is sufficient to protect about 100 potted plants during the summer. It also helps in the vegetative propagation, some annual seed germination.

MANURE PREPARATION:

Being dry deciduous forest we are getting sufficient amount of raw material in the form of fallen leaves. After collecting these leaves, they are dumped in the dumping yard prepared for the manure and make it available for vermicomposting unit for the preparation of compost.

Educational Outreach: Organized workshops and tours educating participants on plant care, biodiversity, and sustainability. Green audit has been carried out by external agency.

5. Challenges and Solutions

- **Technical Hurdles:** Initial issues with QR code scanning were resolved by optimizing placement and signage.
- **Data Accuracy:** Collaborated with experts to verify plant information and ensure database reliability.
- **Engagement:** Increased awareness through promotional campaigns and interactive events.

6. Impact Assessment

- **Environmental Benefits:** Enhanced biodiversity and healthier green spaces on campus.
- **Educational Value:** Empowered students and staff with knowledge about local flora and conservation practices.
- **Community Involvement:** Fostered a sense of shared responsibility for environmental preservation.

7. Future Plans

- Expand the initiative to include nearby community spaces.
- Develop a mobile app for broader access to plant data and conservation activities.
- Increase collaboration with regional and national conservation bodies.

The QR Code Integration initiative has significantly advanced campus sustainability efforts, fostering environmental awareness and engagement among the campus community. Through innovative technology and collaborative efforts, this best practice serves as a model for sustainable development in educational institutions.
